

The OneLeg is an ergonomically designed stool for working at low heights. Originally designed for gardening and other outdoor tasks such as cleaning the car and general maintenance jobs — it has since been used in places such as schools, nurseries and paediatric hospitals by teachers, pupils, nursing staff and young individuals.

### Benefits of using the OneLeg:

- The unique base allows the user to rock and turn 360° around themselves and the stool will follow the movement.
- Provides the user with a wide radius to work within.
- Helps to improve the dynamic stability and co-ordination of the back.
- Muscles in the abdomen are continuously used.
- Allows flexible and dynamic postures which is very beneficial to the user.
- Ideal for use in many different situations, from weeding in the garden to work in “child-sized” environments such as the classroom.
- Enhances learning environments by enabling improved interaction with pupils.
- Can be beneficial for children who suffer with motoric hyperactivity as it gives them the freedom of movement whilst on the stool, without becoming disruptive to others.
- Can be used by everyone from children approx. 4 years old to adults.

### Features:

- Unique curved base.
- Compact for use where space is limited and easy to transport.
- UV safe - UV8 (8000 hours).
- Available in a range of attractive colours.
- 3 heights available.
- Available with anti-slip seat base and seat covers.

### Specifications:
