

MED SLED™

Vertical Lift Rescue Sled

The Med Sled “Vertical Lift” VL Rescue Sled has been specially designed for use in situations where vertical or horizontal extraction, of non-ambulant individuals, by means of a mechanical lifting mechanism is needed.

Features:

- Simple and quick to deploy.
- Sled is 100% assembled for lifting operations.
- Integrated hoist system enables vertical and horizontal lifting.
- Patented Perimeter Tether Design provides patient stabilization.
- Six carry handles.
- Three securing cross straps.
- T-strap at foot end provides extra support.
- Foot-end pulling handle
- Sled can accommodate IV bags, oxygen and other small devices.
- Polypropylene flexible base board enables it to move over most exterior and interior surfaces.
- Can be used with backboard or basket stretcher.
- Each sled rolls up compactly to fit inside a rucksack – double shoulder strap rapid deployment bag, with storage pockets, supplied with every sled.
- Decon capable
- The Med Sled “Vertical Lift” VL Rescue Sled is available in Red, Coyote Brown, or Drab Olive.
- Tag line kit available separately.
