

# MED SLED™

## SCBU Evacuation Baskets

Med Sled SCBU Evacuation Baskets have been specially designed for the safe, secure, emergency movement of premature or high-risk babies from special care baby units. Each basket system comprises of a light weight basket and a cleverly designed O2 harness, enabling carers to remain completely hands free to administer care.

### Basket Features:

- Simple and quick to deploy.
- Can accommodate one baby (of varying sizes) and life-sustaining equipment.
- Cushioned base board.
- Three securing cross straps.
- Underside storage compartment to hold additional items such as notes, nappies and feeding materials which may need to be moved with the baby.
- Four corner female buckles to attach basket to harness.

### O2 Back Pack Features:

- Four front cross straps with male buckles to attach to the baby basket.
- Operator securing chest strap.
- IV bag clip
- Oxygen cylinder storage pouch on the back to accommodate cylinders of various sizes.
- Med Sled SCBU Evacuation Baskets are also available with a small body harness instead of the O2 backpack – see picture.

The Med Sled SCBU Evacuation baskets can be used as a stand-alone device or in conjunction with the SCBU Evacuation Rack system, designed to eliminate the need for infant cots at an alternative care site.

### Specifications:

Basket: 33cm x 61cm 17cm approx.
