

MED SLED™

SCBU Evacuation Basket Rack System

The Med Sled SCBU Evacuation Basket Rack is a portable, light weight, system designed for use at alternative care sites or places of refuge following an emergency evacuation, to eliminate the immediate need for infant beds.

Features & Benefits:

- Six Med Sled SCBU Evacuation Baskets with O2 carry packs.
- One aluminium rack with carry bag.
- Four IV poles.
- Wall mountable, canvas storage case.
- Simple and quick to deploy.
- One rack will accommodate six SCBU Evacuation Baskets.
- Baskets simply slide on and lock securely in place.
- Secures babies in safe and cushioned environment.
- Can accommodate four IV poles – extra sets of two sold separately.
- Waist-high for easy accessibility to babies
- Baskets and rack collapse for easy storage
- Baskets feature underside storage compartments to hold additional items such as notes, nappies and feeding materials.
- O2 carry packs feature an IV bag clip and an oxygen cylinder storage pouch, enabling carers to remain completely hands free to administer care while moving babies.
