

Ergonomically designed kneeler Pad developed to offer a high level of support and protection, to people who spend prolonged periods kneeling while undertaking tasks at low levels.

Featuring Redbacks® patented, SATRA award winning, leaf spring cushioning Technology - scientifically proven to disperse pressure and distribute the weight load evenly throughout the pad.

Features & Benefits:

- Engineered to give support to the knees by suspension rather than compression
- 28 multi directional Redbacks® springs
- Scientifically proven to reduce point pressure and distribute weight - enabling people to work longer
- Can be used for kneeling, sitting and standing
- Long lasting anti-fatigue support
- Suitable for dry and damp conditions
- Penetration resistant waterproof base
- Slip-resistant base
- Thermal protection from warm or cold surfaces
- Zipped cover for easy removal of internal pad
- Internal pad can be used without cover
- Carrying handle
- Fully washable at 30°C

Specifications:

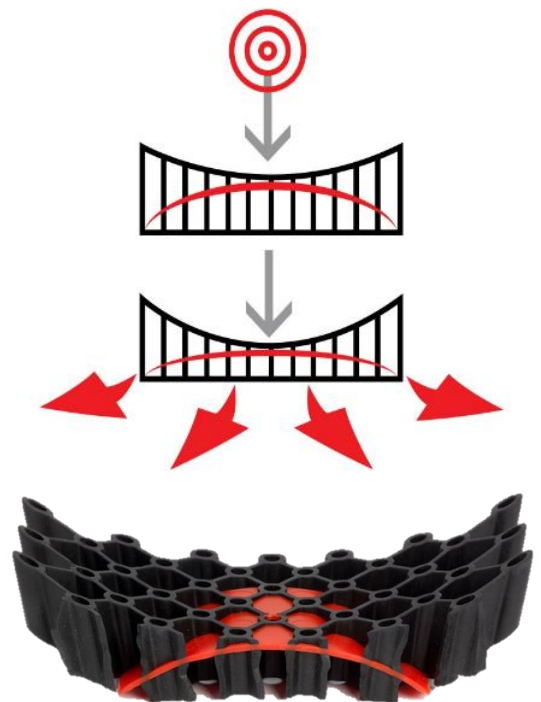

Weight: 1.4kg approx.

Dimensions: length 45cm x width 27cm x depth 3.45m

Pad Material: TPE 100% recyclable

Cover Material: Neoprene, SBR, CR, PET, nylon, Polyester

Product Code: RED003
